Tel 0161 652 7080

Fax 0161 652 4448

All VW Camper, Type 2, Bay Window, Split Screen, T25 Models

On all the above models, we suggest that the following areas should be considered for soundproofing.

INTERIOR CAB

The simplest and easiest way to Sound Proof your camper is as follows

Using Noisekiller Sound Barrier Non Adhesive Mat

- 1 Above the engine bay at the rear of your vehicle using your carpet as a template mark and cut the shape using a **sharp** Stanley Knife (or sharp scissors) on top of a firm surface (**ITEM 2**).
- 2 With the material that is left from the sheet cut the shapes for the upright of the engine bay (usually located under the rear seat). We suggest using a contact adhesive (Evostick type) to keep these pieces in place (**ITEM 3A+3B**).

You will need 1 Sheet of Noisekiller Sound Barrier Non Adhesive to cover this area.

- 3 If you are doing a complete build or re-furb then it is possible to lay Noisekiller Non Adhesive Sound Barrier on the floor of the centre area before you lay your new flooring (**ITEMS 6+7**). Including the area under/in between the front seats (**ITEMS 8, 9+10**).
- 4 To do the front floor area of the vehicle using your carpet as a template (**ITEM 1**).
- 5 With the material that is left cut the two small pieces for above the rear arches (**ITEMS 4+5**).

You will need 2 full sheets of Noisekiller Sound Barrier Non Adhesive to cover this area

***Noisekiller Non Adhesive Sound Barrier is sold in a sheet size 2 x 1.2 metres
Cost of a sheet is £90 inc. vat.***

- 5 The rear wheel arches, front wheel arches, the outer side panels, the panel below the front window and doors are sound proofed using Noisekiller Self Adhesive Barrier Mat.

On the wheel arches you should cover the whole of the wheel arch so that it blocks the noise from the tyres.

On the outer side and front panel use pads cut from the sheet approx 250mm x 150mm. We recommend you stick two pads to each side panel, three pads to each door and four pads to the front panel.

You will need 1 Sheet of Noisekiller Self Adhesive Barrier Mat for these areas.

***Noisekiller Self Adhesive Barrier Mat is sold in a sheet size 2 x 1.2 metres
Cost of a sheet is £70 inc. vat.***

ENGINE BAY

Sound proofing inside the engine is only feasible if the engine is out of the vehicle. If the engine is out then we suggest that the engine bay is lined using our Self Adhesive Foil Faced Lead Sandwich. If the Lead Sandwich is placed hanging upside down then because it is heavy, please use additional fixing on those pieces e.g. Pop Rivets or self-tapping screws to give additional support.

*NoiseKiller Lead Sandwich is sold in a sheet size 2 x 1.2 metres
Cost of a sheet is £140 inc. vat.*

We have created **two main kit** options to cover all the areas mentioned above.

Full Kit Containing material for the rear engine cover, rear bulkhead, middle floor area, in between front seats and front floors along with the material for wheel arches, side and front panels.

Cost **£300 Inc Vat plus Carriage £20 Inc Vat. SAVING OF £40.00!!! [Click here to buy online](#)**

Rear and Front Kit

For those people in a retro fit situation who do not want to lift the middle area covering already in situ. Consisting of material as above but without the middle floor area

Cost **£185 Inc Vat plus £20 Carriage Inc Vat. SAVING OF £30.00!!! [Click here to buy online](#)**

Other options - Roof

The most effective and easiest way to do your roof is with Noisekiller "Egg Box." Self adhesive the Egg Box gives superb noise reduction from rain etc falling onto your roof, and also is great for thermal insulation.

*Noisekiller Egg Box is sold in a sheet size 2 x 1.0 metres
Cost of a sheet is £65 inc. vat.*
